

# SHORT-TERM STOCK TRADING MEMO

*For stocks under ¥300 with volume surge*

---

## PRE-MARKET PREP (8:45 – 9:15)

- Check news, themes (Nikkei, Yahoo News)
  - Open yesterday's watchlist (if any)
  - Get ready with stock screener:
    - Price < ¥300
    - Volume already > 1.5× avg
    - Inflow strong
  - Prepare trading journal (date, capital, blank rows)
- 

## ENTRY WINDOW (9:15 – 9:40)

### Scan Criteria

- Volume surge > 2× average
- Inflow is strong (positive)
- Clean chart setup:
  - W-shape, triangle, flag
  - Breaking resistance or VWAP
- Price still under ¥300
- Bonus: Recent news or theme-driven

### Select 1–2 stocks

- Max ¥100,000 per stock
- Note entry price & volume

### Set Stop-Loss

- ~5% below entry OR below support
  - Record stop price in journal
- 

## DURING THE DAY (10:00 – 14:30)

### Monitor Actively

- Price going up?
  - Move stop-loss up (5% trail)
  - If breakout strong, widen stop-loss to 7–10%

- Price pulling back?
  - Hold if near support or VWAP
  - Exit if breaks support + volume weakens

### **Midday Checklist**

- Are you still in control emotionally?
  - Are setups still valid?
  - No revenge trading, no overtrading
- 

### **TAKE PROFIT LOGIC**

- Price up > 10%? Consider:
    - Sell 30–50%
    - Keep rest with trailing stop
  - No breakout or volume fading? Exit
- 

### **MARKET CLOSE (14:45 – 15:00)**

#### **Review**

- Sell any intraday positions unless swing plan
  - Record:
    - Final price
    - Gain/loss %
    - Trade quality:    /    /
    - Emotion note (was I greedy? fearful?)
- 

### **RULES TO REMEMBER (Post-it version)**

- Only trade top 2 setups daily
- Stop-loss = capital protection
- Don't chase late surges without structure
- No emotion = better results
- Review daily — log, learn, improve
